History: This message has been forwarded.

Dan,

I spoke with Randy. It sounds like he is available the week of Sept 10 for this project. Randy will call you today or very soon to coordinate plans. Evidently we do not have sufficient expertise to run the RAT system entirely independently and will likely need either contract support from START or support from ERT. I will let you and Randy work out the details.

Mary, I am looking at a tentative field mob date of Monday, September 10 for this gamma scan work. I will need 2 OSCs, at least one of whom are familiar with the "RAT" gamma scan system and rad site surveys, as well as one of the UTVs and the RAT system. I anticipate 4-5 days in the field to get this done.

Sincerely,

Dan,

Do you have a schedule for when this work needs to be completed? As soon as we know what your schedule is, we can assign it to an OSC. Thanks.
